Join us for the ever popular BMUS Summer School two day programme

The course is aimed at sonographers, registrars, radiologists and other professional who wish to develop their ultrasound practice. The programme is designed to refresh delegates’ diagnostic ultrasound technique and ensure they are fully updated regarding leading edge practice.

Day 1: Hepatobiliary Ultrasound
This day will provide increased understanding of hepatobiliary pathologies to help deal with everyday diagnostic dilemmas whilst informing delegates of new techniques in the field

- The cirrhotic liver and portal hypertension - A clinical perspective
- Ultrasound of the cirrhotic liver and portal hypertension
- Interventional radiological treatment of portal hypertension
- Paediatric hepatobiliary ultrasound
- Ultrasound of the biliary tree
- What next? A guide to the next test in the investigation of hepatobiliary pathology
- Interactive sessions with:
  - Tips to successful liver Doppler
  - Hepatic Elastography
  - Liver Doppler Practical sessions

Day 2: Ultrasound of the Urinary tract
An interesting day planned to improve delegates’ knowledge of practical technique and commonly encountered pathologies in urological imaging from the fetus to the adult.

- Fetal renal anomalies
- Maternal renal dilatation in pregnancy
- Ultrasound imaging of congenital renal anomalies
- Ultrasound in acute kidney injury
- Haematuria - investigation and management
- Renal cysts and tumours - diagnosis and follow-up
- Ultrasound detection and treatment of renal stones
- The role of ultrasound guided intervention in the management of renal dilatation and stones
- Interactive case presentations

Full programme with faculty to come soon.
