

MSK Dissection Cadaveric Course 5th September 2020, Keele University

BMUS are proud to present an advanced Musculoskeletal ultrasound day.

In the anatomy suite of Keele Medical School surgeons will perform detailed fresh cadaveric dissections of the upper limb.

Adjacent to the surgeon will be an experienced MSK sonographer with a machine and live model.

All this will be streamed live to the lecture theatre at Keele.
Dissections will be driven by the requests of delegates wishing to see specific structures both dissected, on ultrasound and if required, on anatomical diagrams.
