## **About this stream**

BMUS have invited the veterinary profession to partake in their Annual Scientific Meeting where we hope to offer an informal, innovative and informative environment to grow our profession.

The aim of this satellite stream is to unite veterinary and human 'Diagnostic' Medical ultrasound users and allow this multidisciplinary team to support one another professionally within the remit of ultrasound imaging. The stream is aimed primarily at non-specialist imagers, such as Veterinary Nurses and Primary Care Vets who have very little access to competency based ultrasound training in the way that Medical ultrasound users do. We're also hoping to encourage other Diagnostic medical Sonographers who want to diversify and consider veterinary work as an option.

## Programme

- 8:30 Welcome and introduction from the Chair and Co-Chair- Mrs Angie Lloyd-Jones: Diagnostic Medical and SA Veterinary Sonographer, Director of Aspire UCS Ltd and Sonographer at Northwest Veterinary Specialist Hospital and Dr Nuala Summerfield: Veterinary Cardiologist and founder of Virtual Veterinary Specialists (VVS)
