GENERAL MEDICAL ULTRASOUND STUDY DAY

1 Wimpole Street, Westminster,
London, W1G 0AE

NON-OBSTETRIC ULTRASOUND FOR THE GENERALIST

BMUS is delighted to welcome delegates to a face-to-face general medical ultrasound study day. The aim of the study day is to review new and updated pathways of care in which ultrasound imaging plays a pivotal and essential role. The pathway to post-covid recovery is likely to be long and arduous, and this comes at a time when resources, particularly radiologists and sonographers are a scarce commodity.

The presentations will provide up to date advice regarding delivering the most appropriate imaging in key areas within general medical presentations. The day will provide delegates with top tips in imaging practice, managing incidentals findings, and how to ensure ultrasound practitioners are supported to provide the very best in patient care. Join our team of experts as we discuss managing ultrasound demand and findings in the post Covid-19 era.

BMUS 

Members: £100 | Non-Members: £150
Student Members | £60

Programme))
